Professional Summary

Result-driven and highly tech-savvy Project & Product Manager with over a decade of cross-functional experience spanning Software Development, Agile Operations, and Client Management. Proven track record of bridging the gap between complex business requirements and high-performance technical execution, successfully delivering enterprise healthcare and retail solutions (EMR, ERP, IOC). Expert in applying Jobs-to-be-Done (JTBD) frameworks and product discovery methodologies. Pioneer in integrating AI Agents, low-code/no-code automation (n8n, Directus), and Vibe Coding workflows into traditional project management to dramatically accelerate development speed, optimize resource allocation, and eliminate operational bottlenecks.

Education & Certifications

- **Project Management Professional Training**
Advanced Technical PM Frameworks & Agile methodologies
- **Self-Taught AI & Automation Engineer**
Deep specialization in AI Agent architectures, LLM integration, Vibe Coding, and n8n workflow automation
- **Bachelor of Business Administration**
Ho Chi Minh City Open University 2006 - 2010
- **Bachelor of Information Technology**
National Institute of Information Technology (NIIT) 2007 - 2010
- **Graphic Design Certificate**
DPI Center 2010 - 2012

Areas of Expertise & Skills

- **Project & Product Management**
SDLC (Software Development Life Cycle), Agile/Scrum Methodologies, Product Discovery, Jobs-to-be-Done (JTBD), Scope & Requirements Management, Budget & P&L, Risk & Change Management.
- **AI & Technical Automation Leverage**
 - AI-Powered Project Workflows: Architect and optimize project management workflows using AI; design AI Agent architectures to automate operational and routine tasks.
 - Vibe Coding & Rapid Prototyping: Leverage LLMs and AI code assistants to significantly accelerate idea validation, feature testing, and prototype development.
 - Low-code/No-code Integration: Establish flexible, seamless system integrations via webhooks and APIs, reducing dependency on traditional development resources.
- **Business Analysis & Tech Design**
UI/UX Management, Workflow & Data Flow Mapping, Database Design, System Thinking, API Integration Planning.
- **Tools & Tech Stack**
 - Management & Collaboration: Jira, Trello, Asana, Slack, Miro, Google Suite.
 - Data & Backend: Directus CMS, MySQL, PostgreSQL, Nginx, Git/GitHub.
 - Automation Ecosystem: n8n, Zapier, Make.
- **Soft Skills & Leadership**
Stakeholder Expectation Management, Cross-functional Team Coordination (Devs, QAs, Designers, BAs), Interpersonal Communication, Complex Problem Solving.

Professional Experience

● DOLPHIN SOLUTIONS

Project Manager (Software & Technology - Product & Outsource)

March 2025 – March 2026

- Product Ideation & Discovery: Spearheaded product analysis and presented high-level product concepts; collaborated closely with BAs to translate business needs into detailed user flows, feature specifications, and actionable Jobs-to-be-Done (JTBD) frameworks.
- Project Governance: Developed end-to-end project plans, realistic timelines, budget forecasts, and resource allocation models for dual-track (Product & Outsourcing) development environments.
- Execution & Delivery: Followed up and monitored the entire SDLC, unblocking engineering teams (Devs, QAs, Designers) to ensure on-time, within-scope deployment.
- Core Healthcare Products Delivered:
 - Electronic Medical Records (EMR) & Integrated Operations Center (IOC): Successfully deployed and integrated enterprise data management systems for major healthcare institutions, including Hospital for Tropical Diseases (HCMC) and Thuan Chau General Hospital (Son La).
 - Smart Kiosk Systems: Managed the development and rollout of hospital kiosks, successfully automating the entire patient journey including automated queue numbering, appointment scheduling, and digital payment integration.
- Client Success: Managed post-launch client relations, gathering user feedback to prioritize product backlogs and drive continuous feature improvements.

● AUHOME (AUTHENTIC HOMEAWAY) | 2016 – 2025

Regional Operations & Maintenance Coordinator

2022 – 2025

- Directed regional operations and coordinated large-scale renovation, repair, and maintenance projects across the serviced apartment portfolio.
- Managed vendor relations, estimated project costs, and optimized resource allocation to ensure minimal downtime and maintain strict quality control standards.

Co-Founder & Operations Manager

2016 – 2018

- Co-founded and successfully launched a serviced apartment startup model on Airbnb, executing all foundational roles from business planning to P&L management.
- Designed and standardized automated operational workflows (automated check-in/out, digital customer care) to minimize overhead and maximize efficiency.
- Achievement: Maintained an average occupancy rate of >80% and achieved Airbnb Superhost status for multiple consecutive years.

● PANICBEAR CONSULTING

Product Manager (UI/UX Specialist)

2021 – 2022

- Led product management initiatives focusing heavily on user interface (UI) and user experience (UX) enhancement for digital products.
- Conducted user research and usability testing to bridge user pain points with intuitive design layouts, ensuring high user retention and seamless onboarding flows.
- Collaborated with frontend developers and UI designers to maintain design system consistency and streamline the handoff-to-development process.

● CITYHOME

Founder & Operations Manager

2017 – 2021

- Founded and scaled a successful serviced apartment business leveraging the Airbnb platform, managing end-to-end operations, property acquisition, and business strategy.
- Delivered exceptional guest experiences and optimized daily hospitality workflows, maintaining high occupancy rates and driving consistent revenue growth.

Professional Experience

● VIET DANG QUANG CENTER

Teacher Coordinator & Operations Assistant

2019 – 2021

- Managed resource allocation and logistics for educational projects, recruiting, training, and scheduling a team of 40+ expatriate teachers across secondary and high schools in HCMC.
- Served as the primary liaison and conflict resolver between the center, public school boards, and international teachers to ensure smooth project operations.

● CREATIVE CONNECTION

Account Manager

2010 – 2016

- Client-Side Project Management: Spearheaded end-to-end design and communication projects for global corporate clients; managed the lifecycle from initial approach, client pitching, requirements gathering, to concept finalization.
- Cross-functional Alignment: Served as the core communication bridge between corporate stakeholders and internal creative/design teams, delivering high-standard assets (print ads, concepts, video, adaptations) on-time and within budget.
- Key Clients: L'Oréal, GSK, HTC, Lenovo, Zalo.

● TECH-DRIVEN SIDE PROJECTS

Independent Technology Consultant & Product Builder

2022 – Present

- Provide technology consulting, strategic planning, and customized software solutions to solve operational bottlenecks for businesses and individual clients.
- Enterprise ERP (VietGia Medical): Architected and deployed a tailored ERP system leveraging Directus and relational databases (MySQL/PostgreSQL) to digitalize medical distribution; enabled automated workflows to track sales pipelines, agent activities, and real-time project statuses.
- Internal CMS (Auhome): Built a centralized Content Management System (CMS) to manage serviced apartment inventories, booking statuses, and automated operations.
- AI-Powered Knowledge Management System: Designed and engineered an automated personal knowledge vault powered by AI Agents and n8n autonomous workflows to automatically aggregate, tag, process, and synthesize unstructured personal data.
